

ABOUT

I'm a Full-Stack AI Engineer, a developer who enjoys building things. I've worked on a mix of AI products, developer tools, and web applications, both during my internship at Betterstacks and through projects of my own.

EXPERIENCE

Betterstacks — Software Development Intern

Jun 2026 – Aug 2026

AI product features · Analytics · Frontend systems

- Built an AI resume-roaster end-to-end — product flow, LLM integration, and usage analytics
- Shipped a QR profile generator and AI voice-calling system that auto-fills profiles from live calls
- Hardened frontend quality across the platform: layout, responsiveness, and component polish

Betterstacks — Full Stack Web Developer

Oct 2025 – Jan 2026

Full-stack product engineering · TypeScript

- Owned delivery of production features across frontend and backend in a live SaaS environment
- Shipped reliable user-facing work under real release pressure with strong UX polish

SELECTED PROJECTS

Zuno — Chat-Only AI Website Builder

Live Code

Prompt → live Vite + React + TypeScript preview → iterate entirely through chat.

- Designed an agentic loop that turns natural-language prompts into runnable apps with sandboxed live previews

Sandboxing

React

TypeScript

Echo — AI Customer Support Platform

Live Code

Embeddable AI chat trained on docs, with human takeover from an operator inbox.

- Built the full support loop: doc grounding, AI replies, and operator escalation in one product surface

RAG

Next.js

TypeScript

Back It — Product Launch Platform

Live Code

Launch platform where developers get discovered through upvotes, hearts, and saves.

- Built discovery and engagement systems that turn launches into community-driven growth loops
