

ABOUT

I recently built Zuno, an AI website builder so anyone can describe what they want and get a site, and ShowHunt, a Voice AI Product Launch Platform whose voice agent controls the full workflow from navigation to routing and form filling. Looking for Full-Stack AI Engineer roles.

EXPERIENCE

Betterstacks - Full Stack Web Developer Feb 2026 - Aug 2026

- Shipped an AI voice-calling system that transcribes live calls and auto-fills user profiles, plus a QR profile generator around it
- Built an AI resume-roaster in production: the product flow, LLM integration, and usage analytics
- Owned full-stack delivery on the live product: APIs, UI, shared components, and reliability on core screens

Betterstacks - Full Stack Developer Intern Oct 2025 - Dec 2025

- Implemented responsive layouts and shared UI components across core product screens
- Helped wire LLM-backed flows and usage tracking into existing features
- Fixed frontend polish: spacing, breakpoints, and component consistency

PROJECTS

Zuno - Agentic AI Website Builder [Live](#) [Code](#) [Demo](#)

Prompt -> live E2B preview -> iterate in chat -> push to GitHub -> publish with a live link.

- Designed an agentic codegen loop (DeepSeek + file tools) that writes runnable React/Next apps into live E2B sandboxes
- Shipped stack pick, streaming edits, GitHub OAuth push from sandbox, source download, and publish lifecycle

AI Agents E2B LLMs Next.js TypeScript

ShowHunt - Voice AI Product Launch Platform [Live](#) [Code](#) [Demo](#)

Always-on launch platform with Cody, a real-time voice AI companion that operates the product (F2).

- Built Cody on Pipecat + Sarvam STT/TTS + DeepSeek to navigate, search, fill forms, and answer FAQ by voice
- Shipped AI listing drafts, upvote feed, tags, profiles, and Google/email auth around the voice experience

Voice AI Pipecat LLMs Next.js TypeScript

Matiks - Realtime 1v1 Mental Math [Live](#) [Code](#) [Demo](#)

Realtime 1v1 mental math duels: matchmake against online players, race through arithmetic, and win the 60-second sprint.

- Shipped online matchmaking so two players can duel head-to-head in realtime
- Built a 60-second arithmetic sprint with live scoring over the match

WebSockets Realtime Next.js TypeScript

TECHNICAL SKILLS

Applied AI	LLMs · Fine-tuning · AI Agents · Tool calling · MCP · RAG · Context · Memory · Voice AI · Sandboxing · Harness · Evals
Frontend	React · Next.js · TypeScript · JavaScript · Tailwind CSS
Backend	Node.js · Bun · Express.js · REST APIs · WebSockets
Databases	PostgreSQL · Prisma · MongoDB · Drizzle · Redis
DevOps & Tools	Git · GitHub · Docker · Turborepo · AWS (EC2 & S3) · Nginx · Vercel · CI/CD

EDUCATION

Bachelor of Computer Applications - Shoolini University 2025 - 2028
