SUMMARY

Full-Stack Web Developer experienced in building and shipping production web applications with Next.js, React, TypeScript, Express.js, PostgreSQL, and Prisma. Comfortable across the stack — from responsive UI and component architecture to REST APIs and database design.

EXPERIENCE

Full Stack Development Intern — Betterstacks *Oct 2025 – Jan 2026*

- Built the AI resume roaster feature end-to-end and an analytics dashboard to track usage and engagement with roasted resumes.
- Shipped a QR code generator tied to user profiles and an AI voice-calling system that captures user details over a call and auto-fills profiles.
- Fixed and improved frontend UI across the platform — resolving layout and responsiveness issues and polishing existing components.

EDUCATION

Bachelor of Computer Applications (BCA) — Shoolini University *2025 – 2028*

PROJECTS

BackIt — Product Launch Platform [Live](#) [GitHub](#)

- Built a platform where developers list projects, get discovered, and grow through community upvotes, hearts, and saves.
- Implemented user authentication, project listings, and a responsive theme-aware UI with shadcn/ui and route protection via Next.js middleware.

Echo — AI Customer Support Platform [Live](#) [GitHub](#)

- Built an AI-powered support platform with an embeddable chat widget, document training, and an operator inbox for managing conversations.
- Architected as a Turborepo monorepo with a shared shadcn/ui component package and secure authentication via Clerk.

Rize Plus — AI Resume Roaster [Live](#) [GitHub](#)

- Built an AI-powered web app that lets users upload their resume and receive instant, detailed critique highlighting weaknesses and improvement areas.
- Developed the frontend with Next.js and TypeScript, using a drag-and-drop file upload interface and Tailwind-based styling for a clean, minimal UX.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript

Frontend: Next.js, React, Tailwind CSS, shadcn/ui

Backend: Express.js, REST APIs, Prisma ORM

Database: PostgreSQL

Tools: Git, GitHub, Turborepo, Vercel
